SECURITY AWARENESS TRAINING PLATFORM

Audience: All employees

Goal: Human firewall is created through cybersecurity training

Availability: 24/7/365 + anywhere there is internet

Duration: micromodules (5-15 mins) - learning does not interfere with daily work

Activity: training is interactive and requires continuous user involvement

Check: Tests to be carried out after each topic

Validation: electronic certificates issued

Assurance: The platform reports on the progress of training participants.

Personalization: Platform style can be applied to your organization.

CONTENT OF TRAINING

- Passwords
- Clean Desk Policy
- Safe work from home
- Physical safety
- Wi-Fi security
- Mobile devices
- Phishing
- Vishing
- A quick guide to the GDPR

Topics are being added annually and examples are updated to take account of cybersecurity issues.

THE TRAINING PLATFORM WILL ENSURE THAT YOUR STAFF ARE ABLE TO:

- Understand the importance of information and the protection of personal and company data and the risks behind the digital world
- Recognize phishing, vishing, and other attacks of social engineering, create and use strong passwords
- Secure use of Wi-Fi, portable devices
- Respond appropriately to cyber incidents

WHY IS THE PLATFORM NEEDED FOR YOUR ORGANIZATION?

Compliance: GDPR, ISO27001, 27007... cybersecurity law

Protection: constantly changing trends, objectives and scales of cyber attacks

Losses: financial, fines, loss of current and new customers, reputation

Target: the least protected is the weak link of organisations - people

Benefits: Cyber hygiene skills for all employees
