Leading IT Security Awareness Training Platform

Build a Strong Cybersecurity Culture through Employee Training

Solution for small, medium, and large enterprise-level companies

Responsu IT security training platform empowers companies to build a strong cybersecurity culture by enabling employees to recognize common cyber threats.

The solution makes it easy to implement an ongoing training program across the entire organization and comply with GDPR, ISO 2700 regulations.

Responsu helps companies of all sizes and industries turn their employees into human firewalls, reduce costs, simplify training administration and strengthen IT security posture.

- Training administration control

Our Customers

Siauliai district municipality

Responsu has helped a significant number of our employees refresh their IT security awareness. Interactive content, localized examples, and visual elements enabled them to grasp tough cybersecurity topics almost effortlessly.

Jurgita Mickūnė

Legal and Personnel Administration Division Officer, Šiauliai District Municipality

Exceeded our expectations! Our team was contented to obtain hands-on skills which they can apply in professional and personal setup. We have already recommended the training to our partners.
